PROFILE

Software Engineer and University of Victoria co-op student with proven expertise in optimizing full-stack web applications and delivering scalable, high-quality software solutions. Experienced in designing efficient data systems, enhancing performance, and driving impactful user experiences.

PROFESSIONAL EXPERIENCE

Full-Stack Software Developer Co-op

Siteability | January – April 2025 (full-time) | May 2025 – Present (volunteer)

- **Architected and modularized key NUXT 3 components** in Vue to improve performance and usability, increasing new user retention.
- **Independently developed and delivered product releases**, enabling pilot deployments in two new municipalities, which expanded the user base and secured critical project bids.
- **Resolved critical bugs and enhanced product usability**, increasing product compatibility from 80% to over 99% of properties in pilot municipalities, ensuring a seamless user experience and broader applicability.
- **Collaborated with designers, developers, and product managers** in a cross-functional team to deliver responsive and user-friendly web applications using Nuxt 3 and TailwindCSS.

EDUCATION

Bachelor of Science in Computer Science with Co-op

University of Victoria, Victoria, BC | *Expected Fall 2026*

- **Key Coursework**: Software Development, Algorithms, Database Systems, UI/UX Design, Operating Systems.
- Member of the UVic AI Club

TECHNICAL SKILLS

- **Programming Languages:** JavaScript (Proficient), Python (Proficient), C (Proficient), SQL, TypeScript, C++, Java, HTML, CSS
- **Frameworks & Tools:** Vue, NUXT 3, React, Supabase, Tailwind CSS, PostgreSQL, NoSQL, Git, Turf.js
